Seaborn Transport Services

Seaborn's extensive transport solutions comprise Wavelength, Ethernet & ULL services throughout Latin America via infrastructure investments in both subsea and terrestrial fiber assets that connect many of the region's major data centers with international connectivity back to the US.

Service Offering & Features

- Highly diverse capacity on 4 subsea systems connecting 5-countries in LatAm & US
- Connectivity between 20+ key LatAm data centers and NY, JAX, ATL, Ashburn & Miami
- Long Haul, Regional, Metro Wave & Ethernet connectivity within Brazil
- Pan-Regional Ethernet connectivity to Brazil, Argentina, Chile, Peru, Colombia and US
- 100M to 100G options; multi-terabit subsea solutions
- Lowest latency route (Seabras-1) Brazil to US with 3 x ULL options plus Carrier-class

Network Facts

- High capacity solutions available on Seabras-1, AMX1, Monet & SAm-1 subsea cables
- Protected backhaul solutions in NY & Sao Paulo
- Diversely routed capacity between Rio & Sao Paulo
- Metro Dark Fiber connecting 12-data centers in Sao Paulo
- 1G/10G/100G Ethernet Ports available at all locations; OTU and GigE Wave Interfaces
- Multiple Seabras-1 branching units installed for future expansion

Wavelength

Industry leading SLA's across the most reliable POP to POP network in the region

SeaCloud™ Scalable Transport

"Pay-As-You-Grow" model with the 95th percentile
Guaranteed bandwidth availability from 10Gb up to multiple terabits

SeaSpeed™ Ultra Low Latency

Provides access to the most direct, low latency path for services between São Paulo and NY metro

Carrier Ethernet

E-Line, E-Lan and E-Tree Services
Scalable from 10Mb
